ANKIT RANA

DEVOPS AND CLOUD ENGINEER

Mumbai, India |+91 8097783639 | akrana675@gmail.com
github.com/itsakrana | linkedin.com/in/ankit-rana-3a2a05379 | itsakrana.github.io

SUMMARY

DevOps and Cloud Engineer Intern at DataDrone with hands-on experience in CI/CD automation, AWS-to-Azure cloud migration, and Infrastructure as Code (Terraform). Skilled in Linux, GitHub Actions, Kubernetes, Argo CD, Prometheus, and Grafana.

Experienced in validating Azure cloud resources, deployments, and Terraform changes for configuration accuracy and security compliance. Built end-to-end projects covering Kubernetes deployments, GitOps-based release management, secure CI/CD pipelines with integrated DevSecOps scanning, and microservices deployment using reusable Terraform modules

TECHNICAL SKILLS

Cloud Platforms: AWS, Microsoft Azure
CI/CD & Automation: GitHub Actions, Jenkins, Argo CD
Containers & Orchestration: Docker, Kubernetes
Infrastructure as Code: Terraform
Monitoring & Observability: Prometheus, Grafana
DevSecOps & Security: SonarQube, Trivy, OWASP Dependency Check
Version Control & Systems: Git, GitHub, Linux
AI-Assisted Development: Claude Code

EXPERIENCE

DevOps and Cloud Engineer Intern

DataDrone, Chennai, India | May 2026 – Present

• Executed an end-to-end AWS-to-Azure migration, provisioning, migrating, and validating cloud infrastructure using Terraform and GitHub Actions across staging and production environments.
• Automated infrastructure provisioning with reusable Terraform modules for Azure ACR, Container Apps, Monitoring, and Networking (VNet, Subnets), migrating workloads and validating configuration accuracy.
• Built and maintained CI/CD pipelines in GitHub Actions to automate build, test, and deployment stages across staging and production, improving release frequency and reducing rollback risk.
• Collaborated with senior engineers on security hardening, cost optimization, and monitoring setup for migrated cloud workloads

PROJECTS

Helm-Based Kubernetes Application Release Management System

(Kubernetes (K8s) | Helm | Argo CD | Jenkins | Prometheus | Grafana)

- Developed reusable Helm charts for Kubernetes deployments and parameterized environment-specific configurations using values.yaml.
- Automated application deployment, upgrades, and rollback processes using Helm.
- Improved release management and reduced configuration errors by 35% while maintaining consistent deployments across multiple environments.

  GitHub: github.com/itsakrana/NotePad-Project.git

Secure CI/CD Pipeline with Integrated DevSecOps Practices

(DevSecOps | CI/CD | Jenkins | SonarQube | Trivy | OWASP Dependency Check | Docker)

- Designed and automated CI/CD pipelines covering build, test, security scanning, and deployment workflows.
- Implemented SonarQube Quality Gates, Trivy, and OWASP Dependency Check for automated quality and vulnerability scanning.
- Reduced deployment failures by 25% and containerized applications with Docker for consistent, portable environments.

  GitHub: github.com/itsakrana/waterlust.git

DevOps Pipeline for Kubernetes Microservices

(Terraform | Floci | Docker | kind | Helm | Argo CD | Prometheus | Grafana | GitHub Actions)

- Built a local DevOps pipeline for three FastAPI microservices using Floci as an AWS emulator, eliminating cloud credentials and cloud costs.
- Provisioned AWS-compatible VPC, ECR, EKS, S3, and DynamoDB infrastructure using reusable Terraform modules and deployed services to kind with Helm.
- Implemented GitOps with Argo CD, observability with Prometheus and Grafana, strict Kubernetes NetworkPolicies, and CI validation with GitHub Actions.

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT)
RD and SH National College, Mumbai | Expected Graduation: 2027 | CGPA: 8.64
Higher Secondary Certificate (HSC) - Commerce
RD and SH National College, Mumbai | 2024 | 81.67%
Secondary School Certificate (SSC)
St. Aloysius English High School, Mumbai | 2022 | 83.80%

CERTIFICATIONS

AWS Fundamentals - Coursera (2025) | DevOps Foundations - LinkedIn Learning (2026) | Getting Started with Kubernetes - LinkedIn Learning (2026)
